**EXAMINER'S COMMENT**

1. This communication is in response to applicant's response filed on 07/31/2009.
2. Claims 1, 2, 4-8, 10-19, 21-29, and 31-38 are pending.
3. Claims 3, 9, 20 and 30 are cancelled.
4. Applicant's arguments are persuasive in the light of Appeal Brief filed on 07/31/2009. Therefore the rejections of the claims have been withdrawn.

***Allowable Subject Matter***

1. Claims 1, 2, 4-8, 10-19, 21-29, and 31-38 are allowed.
2. The following is an examiner's statement of reasons for allowance:  
  
Hodges, the prior art of record teaches a method of transacting a secure ATM transaction via the Internet, comprising: browsing a merchant web site by a user; initiating a secure payment transaction at the merchant web site prompting a consumer through the process of entering payment data; creating an encrypted PIN block; building an encrypted payment block at the consumer's Internet access device that includes the encrypted PIN block and the payment data enclosed in two or more layers of encryption and forwarding the encrypted payment block to a secure host without sending the encrypted payment block to the merchant web site; decrypting the payment block at the secure host and routing the decrypted payment block to a payment processor to request

Art Unit: 2434

authorization for the payment transaction; and if the payment processor sends an authorization for the payment transaction, then forwarding the authorization to the consumer and the merchant.

However, the Hodges reference does not teach the following limitations of claim 1:

a front end Hardware Security Module (HSM) coupled to the ACS, and configured to receive the passcode in an encrypted format and generate an encrypted passcode using a local encryption key; and

a back end HSM configured to receive the encrypted passcode from the front end HSM and further configured to recover a clear form of the passcode, generate a back end encrypted passcode, and communicate the back end encrypted passcode to an authentication network, wherein the system authenticates the passcode, wherein the ACS is further configured to receive an authentication message from the authentication network".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2434
